

TRUE NORTH GEMS

MANAGEMENT DISCUSSION AND
ANALYSIS

FOR THE NINE MONTH PERIOD ENDED
SEPTEMBER 30, 2009

TRUE NORTH GEMS

Management's discussion and analysis ("MD&A") provides a review of the performance of True North Gems Inc.'s ("True North" or the "Company") operations and has been prepared on the basis of available information up to November 24, 2009 and should be read in conjunction with unaudited interim consolidated financial statements for the nine month period ended September 30, 2009, the audited consolidated financial statements for the year ended December 31, 2008 and the related notes thereto, which have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP"), as well as the Company's December 31, 2008 Annual MD&A. All dollar amounts referred to in this discussion and analysis are expressed in Canadian dollars except where indicated otherwise.

Forward Looking Statements

The forward-looking information in the MD&A section is based on the conclusions of management. The Company cautions that due to risks and uncertainties, actual events may differ materially from current expectations. With respect to the Company's interests in mineral properties, actual events may differ from current expectations due to exploration results, new exploration opportunities, changing budget priorities of the Company and other factors.

CORPORATE

On March 2, 2009, the Company announced the appointment of Rejane Amaral as Greenland Project Manager and the addition of Iain Groves as Senior Exploration Geologist. Concurrently Greg Davison resigned as VP Exploration. On July 27, 2009, Gregory Fekete resigned as a Director and Corporate Secretary to pursue other business opportunities. Martin Irving was appointed to the Board of Directors on August 31, 2009.

FISKENAESSET RUBY PROJECT – GREENLAND

During the six-month period ended June 30, 2009, the Company's technical personnel continued to evaluate the results of the 2008 exploration program and plan the field program for 2009. Manufacturing experiments with the ruby and pink sapphire remained ongoing, albeit at a reduced level. The polishing of cuttable material from the 2006 bulk sample is now near completion and the rough inventory from the 2007 bulk sample remains in secure storage until decisions have been made for further processing.

During the most recent quarter ended September 30, 2009, the field related components of the 2009 advanced exploration and engineering program on the Company's 100% owned Fiskenaesset Ruby Project located on the southwest coast of Greenland was completed. The strategic focus of the 2009 program was the acquisition of data required to support the Company's application for an exploitation (mining) permit to facilitate subsequent test mining and test marketing. The field program began in late July and concluded the first week of September and successfully achieved the following objectives:

- (1) Completion of environmental baseline data collection in drainages in the Aappaluttoq prospect area and initiation of environmental studies;
- (2) Significant advancement of pre-feasibility related engineering and capital cost studies coordinated by M.T Hojgaard;
- (3) Shipping of the 160 tonne 2008 Aappaluttoq bulk sample and overburden sample to Canada for processing;
- (4) Initiation of the processing for the 2008 Aappaluttoq bulk sample and overburden sample;
- (5) Sampling of alluvial material from the margins of the north side of the Aappaluttoq Peninsula in Lake Katrina;
- (6) Re-interpretation of surface outcrops and logging of all drill core from the Aappaluttoq prospect area using Niton technology and revised geological interpretations;
- (7) Bathymetric surveys of Lake Katrina to evaluate engineering alternatives and environmental studies. This lake immediately adjoins the Aappaluttoq prospect; and,
- (8) Exploration of the Qaqqatsiaq licence and follow up on the Fiskenaesset license of areas of interest identified in the 2008 season.

TRUE NORTH GEMS

True North's management believes the 2009 work program has provided valuable technical information that will allow the Company to advance towards its goal of submitting an application for an exploitation (mining) permit for the Fiskenaasset Ruby Project in Greenland. Furthermore, the geological programme has enhanced the understanding of the ruby and pink sapphire occurrences in the Fiskenaasset district.

Ongoing exploration and development programs and quality control programs at the Fiskenaasset and Qaqqatsiaq Ruby Projects are under the supervision of True North's technical team lead by Andrew Lee Smith, P.Geo., President and CEO, Rejane Amaral, M.Sc., FCGmA, Project Manager, Iain Groves, B.Sc., Senior Exploration Geologist, and Bonnie Weston, P.Geo., G.G., A.J.P.. Mr. Smith and Ms Weston are Qualified Persons as defined by National Instrument 43-101.

Additional detail on the Fiskenaasset Ruby Project is set out in the 43-101 Report of Activities submitted March 31, 2009 to the requisite regulatory authorities and is available on the Company's website (www.truenorthgems.com).

BELUGA SAPPHIRE PROJECT – BAFFIN ISLAND, CANADA

The Company continues to evaluate the results of work completed to date, including the results from the regional and detailed geological mapping and prospecting work completed in 2008, in order to assess the logical next step for future exploration.

To that end, the Company intends to initiate a comprehensive compilation of all available technical information to facilitate the project evaluation process. Due to the Company's focus of its resources on the Fiskenaasset Ruby project, no 2009 field program for the Beluga sapphire property is planned at this time. The project will remain on care and maintenance.

The Company continues to work with the sapphire bearing material recovered from processed samples from previous exploration programs and awaits the processing of the 2008 mini-bulk samples and will be releasing the results of this work as they become available.

TSA DA GLISZA EMERALD PROJECT – YUKON, CANADA

Due to the Company's focus of its resources on the Fiskenaasset Ruby project, no 2009 exploration program for the Tsa da Glisza Emerald property is planned at this time. The project will remain on care and maintenance.

The Company continues to assess the potential of the Tsa da Glisza Emerald property through internal review. The project will remain on care and maintenance.

BANDITO PROJECT – YUKON, CANADA

This project is an early stage, polymetallic exploration project and has not advanced to a resource definition stage.

Due to the Company's focus of its resources on the Fiskenaasset Ruby project, no 2009 exploration program at the Bandito property is planned at this time.

The Company continues to seek option and/or sale agreements for this project.

BATEA PROJECT – YUKON, CANADA

The property comprises fifty-six claims 200 kilometres east of Whitehorse, Yukon.

The Company continues to assess the polymetallic potential of the Batea prospect and intends to seek option and/or sale agreements for this project.

TRUE BLUE PROJECT – YUKON, CANADA

The property comprises 94 claims located 55 kilometres south of Ross River, Yukon.

The Company completed a small exploration program at the property in 2009 to explore the potential for rare earth elements. The program was funded in part by the Yukon Mining Incentives Program (YMIP). Grab samples were collected at three separate locations and have returned assays up to 6.02% Total Rare Earth Oxides + Yttrium

TRUE NORTH GEMS

(TREO) and 2.52% Niobium Oxide (Nb₂O₅) (see press release dated September 24, 2009).

The Company continues to seek option and/or sale agreements for this project.

FINANCIAL POSITION

As at September 30, 2009, the Company had current assets of \$379,426 and current liabilities of \$566,929 compared to current assets of \$214,239 and current liabilities of \$1,334,956 as at December 31, 2008. At September 30, 2009, the Company had a working capital deficit of \$187,503 compared to working capital deficit of \$1,120,717 at December 31, 2008.

Capital (share capital and warrants) as at September 30, 2009 was \$34,265,340 compared to \$31,912,232 as at December 31, 2008. During the nine month period ended September 30, 2009, True North raised additional capital of \$2,861,000 from the issue of 28,610,000 shares and 28,610,000 warrants. The agent's were issued 274,383 warrants. The capital raising costs for this placement amounted to \$259,259 (shares - \$184,287/warrants -\$74,972). In addition, the Company issued 925,676 shares to satisfy its obligation pursuant to the terms of the Option Agreement on the Greenland property and 5,501,645 warrants expired resulting in the fair value of these instruments of \$347,990 being credited to contributed surplus.

NET LOSS

The net loss for the quarter ended September 30, 2009 was \$635,211 or \$0.01 per share compared to \$385,566 or \$0.01 per share for the quarter ended September 30, 2008 representing an increase of \$249,645. Included in the current quarter results are a foreign exchange gain of \$1,565, and interest income of \$137.

The net loss for the nine month period ended September 30, 2009 amounted to \$1,075,389 or \$0.01 per share compared to a net loss for nine month period ended September 30, 2008 of \$1,287,659 or \$0.02 per share. Included in the nine month period results are a foreign exchange gain of \$20,776, a gain on sale of available-for-sale investments of \$8,919,

TRUE NORTH GEMS

interest earned on surplus funds on hand of \$2,746 and loss on sale of equipment of \$148.

Expenses

For the quarter ended September 30, 2009, total expenses were \$636,913 compared to \$349,853 recorded during the same period in 2008, representing an increase of \$287,060 or 82%. Included in expenses is a charge of \$360,935 (2008 - \$Nil) for stock-based compensation. After adjustment for stock-based compensation expenses totalled \$275,978 (2008 - \$349,853) representing a decrease of 21%. For the nine month period ended September 30, 2009, total expenses were \$1,107,682 compared to \$1,303,014 for the nine month period ended September 30, 2008 representing a decrease of \$195,332 or 15%. Included in expenses is a charge of \$360,935 (2008 - \$194,647) for stock-based compensation. After adjustment for stock-based compensation expenses totalled \$746,747 for the nine month period ended September 30, 2009 compared to \$1,108,367 for the nine month period ended September 30, 2008 representing a decrease of \$361,620 or 32%. Significant factors that contributed to the variances are discussed below.

Consulting fees and corporate development fees

For the quarter ended September 30, 2009, expenses charged to consulting and corporate development fees of \$85,890 were charged in the accounts. Consulting and corporate development fees for the quarter ended September 30, 2008 were \$152,840 representing a decrease of 44%. For the nine month period ended September 30, 2009, expenses charged to consulting and corporate development fees of \$250,070 were charged in the accounts. Consulting and corporate development fees for the nine month period ended September 30, 2008 were \$332,331.

Corporate secretarial and accounting services fees

For the quarter ended September 30, 2009, corporate secretarial and accounting services were \$25,225 compared to \$24,144 for the quarter ended September 30, 2008, an increase of \$1,081. The corporate secretarial and accounting service fees were \$62,071 for the nine month period ended September 30, 2009 compared to \$71,819 for the comparative period.

Directors fees

Independent directors are being paid fees quarterly to compensate them for their time invested in fulfilling their duties. A total of \$33,000 has been recorded as paid/payable to directors in the current financial year.

General and administration

For the quarter ended September 30, 2009, general and administrative expenses were \$44,643 compared to \$40,349 for the quarter ended September 30, 2008. General and administrative charges were \$101,283 for the current nine month period ended September 30, 2009 compared to \$115,902 for the comparative period. Included in this category are bank fees, communications lines (telephone, facsimile and internet), delivery, interest, office supplies, printing and reproduction.

Investor/shareholder relations

For the quarter ended September 30, 2009, investor relations expenses were \$29,138 compared to \$47,183 for the quarter ended September 30, 2008. Investor relation charges were \$79,196 for the nine month period ended September 30, 2009 compared to \$282,582 for the comparative period. In the first quarter of 2008, True North launched its rebranding program; including new logo, brochures, website, presentations, etc. to reflect its focus on the Fiskenaasset project. Additionally the decrease in spending in current year is reflective of the economic conditions and limited financial resources.

Travel

For the quarter ended September 30, 2009, travel expenses were \$22,801 compared to \$19,093 for the quarter ended September 30, 2008, an increase of \$3,709. Travel charges were \$45,133 for the nine month period ended September 30, 2009 compared to \$89,870 for the comparative period. Financial constraints in the current financial year have resulted in a conscious decision to reduce travel to the extent possible. In prior comparative period, extensive travel as done by the Chief Executive Officer to meet with various investment groups to procure funds and by the VP of Product Development and Marketing to oversee gemstone processing in the Bangkok manufacturing facility.

TRUE NORTH GEMS

CAPITAL EXPENDITURES

During the nine month period ended September 30, 2009, the Company spent \$999,216 (2008-\$4,777,683) on its capital spending program. Capital expenditures by project and category are as follows:

	Nine months ended September 30,	
	2009	2008
Acquisition*		
Greenland Property - Ruby	\$ 55,483	\$ 9,779
Exploration**		
Greenland Property - Ruby	941,681	4,385,916
Baffin Island Property - Sapphire	1,845	358,029
Tsa da Glisza Property - Emerald	(3,881)	20,899
Bandito Property (Yukon) - Nickel	4,088	3,060
	943,733	4,767,904
Total capital expenditures	\$ 999,216	\$ 4,777,683

* - excludes shares issued for mineral properties of \$78,750 (2008-\$54,677).

** - excludes advances of \$35,000 (2008-\$9,902), proceeds from sale of equipment of \$17,010 (2008-\$Nil) & stock-based compensation \$72,059 (2008-\$66,365).

Financial constraints have resulted in limited work being done on the Company's projects in the current financial year.

SUMMARY OF QUARTERLY RESULTS

* Values may not add to reported amount for the years then ended due to rounding

There are no meaningful trends evident from analysis of the summary of quarterly financial information over the last eight quarters. The Company carries out exploration activities in Canada and Greenland. The Company's exploration activities are seasonal in nature and programs tend to start late spring and end early fall.

Factors that can cause fluctuations in the Company's quarterly results are the timing of stock option grants, mineral property impairments, sales of available-for-sale investments and impairments in available-for-sale investments that are considered to be other than temporary. The Company's properties are not yet into production and consequently, the

TRUE NORTH GEMS

Company believes that its loss (and consequent loss per share) is not a primary concern to investors in the Company.

LIQUIDITY AND CAPITAL RESOURCES

At September 30, 2009, the Company had cash of \$297,424 and a working capital deficiency of \$187,503. The deficit is primarily attributable to the capital spending on the Greenland project during the financial year ended December 31, 2009 and ongoing operating costs in excess of funds raised from equity placements.

Cash on hand at September 30, 2009 is not adequate to meet requirements for fiscal 2009. To meet working capital requirements, the Company will have to access financial resources through equity placements in the junior resource market, procure industry partners for its primary exploration projects and/or sell its projects in exchange for equity/cash.

Capital Resources and Going Concern

True North has been successful in meeting its capital requirements through the completion of equity placements. Although the Company has been successful in obtaining the necessary financing to continue operations in the past, there can be no assurance that it will be able to continue to do so in the future. The Company's financial statements have been prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. Several adverse conditions cast significant doubt on the validity of that assumption. During the nine month period ended September 30, 2009, the Company incurred a net loss and utilized funds in operations totaling \$1,075,389 and \$1,352,002 respectively. The accumulated deficit at September 30, 2009 is \$17,321,475. The Company has limited financial resources, no source of operating cash flow and no assurances that sufficient funding will be available to conduct further exploration and development of its mineral property projects.

The ability of the Company to continue as a going concern will depend upon the following:

- The ability to raise further funds through the issue of equity financing or through joint ventures;
- Continued financial support from creditors; and,
- The sale of non-core assets in the ordinary course of business.

Although the Company has been successful in obtaining the necessary financing to continue operations in the past, there can be no assurance that it will be able to continue to do so in the future.

If the going concern assumption were not appropriate for these financial statements, then adjustments would be necessary in the carrying values of assets, liabilities, the reported income and expenses and the balance sheet classifications used. Such adjustments could be material.

The Company has historically financed its exploration programs through the issuance of equity capital, while at the same time trying to reduce shareholder dilution by securing joint venture partners where appropriate. The current equity market conditions, the challenging funding environment and the low price of the Company's common shares make it dilutive and difficult to raise funds by the sale of the Company's shares. The junior resource industry has been severely impacted by the world economic situation, as it is considered to be a high-risk investment. In order to ensure its ability to continue operating, the Company has negotiated extensions on payment of certain accounts payable and is also examining various funding alternatives. However, there is no assurance that any such activity will generate funds that will be available for investments or operations.

Uncertainty is a prevalent element in exploration and therefore can, on occasion, impede the Company's ability to meet its financial requirements and result in an inability to advance exploration assets and meet objectives in a timely manner.

As of September 30, 2009, the Company has no long-term debt.

The Company has only one significant, contractual obligation, a lease on office space, which expires in September 30, 2013 and represents a total dollar obligation of \$576,720 over the five year lease term, or \$9,612 per month. This obligation and other long-term overhead items will require funding through new capital resources.

The Fiskenaasset Licence was obtained by the Company satisfying all the terms of an option agreement with Brereton Engineering and Developments Ltd. ("Brereton"). Ongoing commits from the option agreement include cash payments

TRUE NORTH GEMS

of \$50,000 and issue of \$50,000 worth of shares from treasury annually for each year (issued February 11, 2009) the Company maintains the exploration licence. Brereton agreed to defer payment of the \$50,000 (paid August 21, 2009) that was due January 1, 2009. As consideration, the Company issued Brereton an additional 250,000 shares from treasury. Once an exploitation (mining) permit is obtained the Company is required to make a one time cash payment of \$500,000 and issue \$500,000 worth of shares from treasury.

As of September 30, 2009, the Company has no long-term contractual agreements to acquire mineral properties. To maintain the Greenland licences in good standing, the Company is required to meet minimum exploration expenditures. However, the fulfillment of these obligations is optional, at the discretion of True North.

TRANSACTIONS WITH RELATED PARTIES

In the normal course of business, True North has had transactions with individuals and companies considered related parties. Related party transactions involve normal commercial compensation for services rendered by senior management, officers, directors or insiders of the Company and by companies with which they are associated as owners, contractors or employees.

Andrew Lee Smith is the President and CEO, and a Director, of True North and provides contracted consulting services to the Company through Iron Mask Explorations Ltd.

Robert Boyd is the Chairman of the Board to True North.

Nick Houghton is Vice-President of Product Development and Marketing, and a Director of the Company, and provides consulting services to True North through Cadiam Investments Ltd.

Gregory Fekete was Corporate Secretary of the Company up to July 27, 2009 and provided consulting services to True North through Gregory Fekete Professional Corp.

William Anderson, Robert Boyd, Martin Irving and John Ryder are Independent Directors of True North. Mr. Irving was appointed to the Board of Directors on August 31, 2009. During the nine month period ended September 30, 2009, \$33,000 in aggregate has been recorded as paid/payable to these directors to compensate them for their time to fulfill their duties and obligations to the Company in this capacity.

David S. Parsons is True North's CFO and provides consulting services to the Company.

Greg Davison was Vice-President of Exploration up to March 1, 2009 and provided consulting services to True North through Davison & Associates.

During the nine month period ended September 30, 2009, officers charged \$280,558 in fees for services rendered. These transactions were entered into on a normal commercial basis.

During the nine month period ended September 30, 2009, Austring Fendrick Fairman & Parkkari, a firm in which Greg Fekete, an officer of the Company is a partner charged fees of \$536 for legal services. These transactions were entered into on a normal commercial basis.

PROPOSED TRANSACTIONS

As of March 31, 2009, the Company has no proposed material transactions.

CRITICAL ACCOUNTING ESTIMATES

The significant accounting policies used by True North are disclosed in note 2 to the annual consolidated financial statements. Certain accounting policies require that management make appropriate decisions with respect to the formulation of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Management reviews its estimates on a regular basis. The emergence of new information and changed circumstances may result in actual results or changes to estimated amounts that differ materially from current estimates. The following discussion helps to assess the critical accounting policies and practises of the Company and the likelihood of materially different results being reported.

TRUE NORTH GEMS

MINERAL PROPERTIES AND RELATED DEFERRED COSTS

The Company follows the method of accounting for its mineral properties whereby all costs related to acquisition, exploration and development are capitalized by area of interest. These expenditures are carried forward where rights to tenure of the areas of interest are current and it is expected the expenditure will be recovered through successful development and exploitation of the area of interest or alternatively by its sale. Expenditures are also carried forward where activities are continuing in the area of interest but have not yet reached a stage of development, which permits reasonable assessments of the existence or otherwise of economically recoverable reserves. Expenditures that are determined to be impaired are written off.

When events and circumstances indicate possible impairment, management reviews the carrying value of each of the Company's mineral properties. Where information is available and conditions suggest impairment, estimated future net cash flows are calculated using estimated future prices, proven and probable reserves, resources and operating and capital costs on an undiscounted basis. An impairment charge is recorded if the undiscounted future net cash flows are less than the carrying amount. Reductions in the carrying value, with a corresponding charge to operations, are recorded to the extent that the estimated future net cash flows on a discounted basis are less than the property interest carrying value.

Where estimates of future net cash flows are not available and where other conditions suggest impairment, management assesses whether the carrying value can be recovered. If impairment is identified, the carrying value of the property interest is written down to its estimated fair value.

From time to time, the Company acquires and disposes of properties pursuant to the terms of option agreements. Options are exercisable entirely at the discretion of the optionee, and accordingly, are recorded as mineral property costs (recoveries) when payments are made or received.

Although the Company has taken steps to verify title to mineral properties in which it has an interest according to the usual industry standards, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

RECLAMATION COSTS

The amounts recorded for reclamation costs are estimates based on engineering studies and management's assessment of the work that is anticipated to remediate the Tsa da Glisza, Baffin Island and Greenland sites based on the current state of ground disturbance. The provision for reclamation is determined on an annual basis.

STOCK-BASED COMPENSATION

Compensation expense for options and warrants granted is determined based on estimated fair values of the options and warrants at the time of grant, the cost of which is recognized over the vesting period of the respective options and grants. The key parameters impacting the calculation of fair value of options and warrants are the share volatility and the expected life.

FINANCIAL INSTRUMENTS

Financial instruments consist of cash, investments, accounts receivable, accounts payable, accrued liabilities and loans payable. At September 30, 2009 and December 31, 2008 there were no significant differences between the carrying amounts of the financial instruments reported on the balance sheet and their estimated fair values due primarily to the short-term maturity of the financial instruments.

ACCOUNTING POLICIES

The Company has established accounting policies generally accepted in Canada and applicable to development stage enterprises in the resource sector, which are applied on a consistent basis.

Changes in Accounting Policies

TRUE NORTH GEMS

Effective January 1, 2009, the Company has adopted the guidelines governed by the following Sections of the Canadian Institute of Chartered Accountants (“CICA”) Handbook:

GOODWILL AND INTANGIBLE ASSETS

The CICA issued the new Handbook Section 3064, “Goodwill and Intangible Assets”, which will replace Section 3062, “Goodwill and Other Intangible Assets”. The new standard establishes revised standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets. The new standard also provides guidance for the treatment of preproduction and start-up costs and requires that these costs be expensed as incurred. The new standard applies to annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The adoption of this standard has not had an impact on the Company’s financial statements.

NEW ACCOUNTING STANDARDS

INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”)

The Canadian Accounting Standards Board (“AcSB”) recently confirmed that International Financial Reporting Standards (“IFRS”) will replace Canadian standards and interpretations on January 1, 2011. The process of changing from current Canadian GAAP to IFRS will be a significant undertaking that may materially affect reported financial position and results of operations and also affect certain business functions.

The Company has not yet completed a full evaluation of the adoption of IFRS and its impact on its financial position and results of operations. The full evaluation and an implementation plan will be completed before December 31, 2010. The progress of the evaluation and implementation plan will be addressed in the Company’s quarterly and annual MD&As for the year ended December 31, 2010. The evaluation and implementation plan will address the impact of IFRS on:

Accounting policies, including choices among policies permitted under IFRS and implementation decisions such as whether changes will be applied on a retrospective or prospective basis;

- Information technology and data systems;
- Internal control over financial reporting;
- Disclosure controls and procedures, including investor relations and external communications plans;
- Financial reporting expertise, training requirements and the need for assistance from outside expertise; and,
- Post implementation monitoring to access any future developments of IFRS.

BUSINESS COMBINATIONS/CONSOLIDATED FINANCIAL STATEMENTS/NON-CONTROLLING INTEREST

In January 2009, the Canadian Institute of Chartered Accountants (“CICA”) adopted Handbook sections 1582, “Business Combinations”, 1601, “Consolidated Financial Statements” and 1602, “Non-Controlling Interest”, which superseded current sections 1581, “Business Combinations” and 1600, “Consolidated Financial Statements”. These sections will be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2011. Earlier adoption is permitted. If an entity applies these sections before January 1, 2011, it is required to disclose that fact and apply each of the new sections concurrently. These new sections are the Canadian equivalent to IFRS.

ADDITIONAL DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE

Refer to the interim financial statements for capitalized or expensed exploration and development costs, general and administration expenses and other material costs.

OUTSTANDING SHARE DATA

At September 30, 2009, True North had 108,964,133 common shares, 43,494,726 warrants and 9,400,000 options issued and outstanding.

As at the date of this report, True North had 108,964,133 common shares, 43,494,726 warrants and 9,400,000 options issued and outstanding.

RISK FACTORS

Mineral exploration and development involves a high degree of risk and few properties that are explored are ultimately developed into producing mines. There is no assurance that the Company's mineral exploration activities will result in any discoveries of new bodies of commercial gemstone deposits. There is also no assurance that if a commercial gemstone deposit is discovered that the ore body would be economical for commercial production. Discovery of mineral deposits is dependent upon a number of factors and significantly influenced by the technical skill of the exploration personnel involved. The commercial viability of a mineral deposit is also dependent upon a number of factors, which are beyond the Company's control. Some of these factors are the attributes of the deposit, gemstone and jewellery market, government policies and regulation and environmental protection. True North Gems is a unique company and as such subject to risk factors which are not shared by other, traditional junior exploration companies. These risks are associated with the lack of an existing coloured gemstone industry infrastructure in Canada. For example, the Company's reliance on uncertified foreign laboratories for cutting and manufacturing requires a lengthy process of testing and assessing in order to develop business relationships with reliable partners in foreign jurisdictions. Also, the resistance to innovation prevalent in the junior mining financial community presents challenges to True North Gems in communicating the value of the Company's assets and competing for market attention. Aspects like this add an element of risk to the Company's business not imposed on junior precious and base metal exploration companies. These are risk factors similar to those encountered, and overcome by a nascent junior diamond industry in the early 1990's and risks that are continually being addressed by the Company's technical and promotional programs.

Caution on Forward-Looking Statements

The MD&A contains certain forward-looking statements concerning anticipated development in True North's operation in future periods. Forward-looking statements are frequently, but not always identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible" and similar expressions, or statements that events, conditions or results "will", "may", "could" or "should" occur or be achieved. The forward-looking statements are set forth principally under the heading "Outlook" in the MD&A and may include statements regarding exploration results and budgets, mineral resource estimates, work programs, capital expenditures, timelines, strategic plans, market price of gemstones or other statements that are not statement of fact. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements of True North may differ materially from those reflected in forward-looking statements due to a variety of risks, uncertainties and other factors. True North's forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and True North does not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations or opinions should change except as required by law. For the reasons set forth above, investors should not place undue reliance on forward-looking statements. Important factors that could cause actual results to differ materially from True North's expectations include uncertainties involved in disputes and litigation, fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of drill results and the geology, continuity and grade of deposits; uncertainty of estimates of capital and operating costs,

TRUE NORTH GEMS

recovery rates, production estimates and economic return; the need for cooperation of government agencies and native groups in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty in meeting anticipated program milestones; uncertainty as to timely availability of permits and other government approvals and other risks and uncertainties disclosed in other information released by True North from time to time and filed with the appropriate regulatory agencies.
